

VMAC ADJUSTS PLANS FOR UNITED KINGDOM

Nanaimo, BC, July 23, 2018 – VMAC announced today the termination of its distribution agreement with Original Ltd to represent the VMAC brand of mobile compressed air equipment in the United Kingdom, effective July 14, 2018. Techni Ltd., based in Shrewsbury U.K., continues to represent VMAC in the United Kingdom and Europe as VMAC’s official distributor.

“Original has been instrumental in selling and supporting the VMAC under bonnet product in the U.K. marketplace for the past eight years” said Gordon Duval, Vice President Sales and Marketing for VMAC Global Technology Inc. “The market realities today are such that the VMAC brand requires a more specialized focus in sales and support of our mobile compressed air equipment through partners who are capable of representing the complete product line that VMAC offers” Duval continued.

“The VMAC brand is widely recognized and respected in the U.K., and we believe there is strong demand for our complete mobile air compressor line. The VMAC product line is perfectly suited to the variety of applications and industries that require the most innovative, compact, powerful and high quality mobile compressed air systems available” said Duval.

In June 2016 VMAC appointed Shrewsbury, U.K. based Techni Ltd. as a distributor of VMAC products for the U.K and Europe.

“VMAC is very pleased to further grow its partnership with Techni Ltd., one of the most respected market leaders in the design and manufacture of cast mount and drive solutions for mobile transport industries” said Duval. “Techni’s long history and significant experience ensures that the VMAC under bonnet product line will be fully supported for all product sales, installations, spares and after sales service within the U.K and Europe.

“VMAC air compressors are the smallest, most lightweight and powerful engine mounted systems available in the world, and we are very pleased to be representing the VMAC product line in the U.K. and Europe” said Lynsay Doel, Director at Techni Ltd.

VMAC’s latest innovation, the VR40 air compressor offers 40 CFM at 100% duty cycle, weighs only 14 pounds and is 60% smaller than competitive products.

“In addition, Techni will also offer VMAC’s range of deck mounted mobile compressed air solutions including the industry leading 40 & 60 CFM Hydraulic Driven Air Compressors, 30 CFM Gas Engine Driven Air Compressor, and the award winning 45 CFM 6-In-1 Multifunction Power System.” Doel also commented.

“With a core focus on the delivery of superior products and customer service, Techni Ltd. aligns perfectly with VMAC’s philosophy and commitment to be the leader in mobile compressed air innovation, ensuring continued growth in the U.K. and Europe for both our companies” said Duval.
